

Transfusing Wisely Webinar

Tuesday 06 December 2022 | 13:00-14:00 GMT

Winter is always a difficult time for blood stocks. Avoidable transfusion and inappropriate use of O D-negative red blood cells remain a challenge for organisations, particularly considering the recent Amber alert issued by NHS Blood & Transplant.

Please join us for our webinar where SHOT Working Expert Group members and representatives from the 4 UK Blood Services will provide an overview of Patient Blood Management (PBM) activities & share key learning points.

This 1-hour webinar is free to access and will include:

A 40-minute presentation about avoidable transfusion and inappropriate use of O D-negative red blood cells

A 15 minute interactive Q&A session

An excellent opportunity for CPD through reflective practice - with the following learning themes:

- Avoidable transfusions in haematinic deficiency and inappropriate use of O D-negative red blood cells reported to SHOT
- Overview of PBM activities from all 4 UK Blood Services
- Q&A with all presenters + UKTLC, PBM England and the National Transfusion Practitioner Network

This webinar is relevant to all healthcare professionals involved in transfusion and patient blood management – nursing staff, laboratory staff, clinicians, transfusion practitioners, as well as haemovigilance and risk management specialists

Register for the event here: https://us06web.zoom.us/webinar/register/WN_q06ya4TqT6eYkV2rYzhOmw

The Zoom link to the live event is contained in the registration email.

****The event will start promptly, please join at least 5 minutes prior to the start****
